Who is Dalkar Engineering?

Dalkar Engineering is an Australian manufacturer who specializes in the fabrication of pipe work systems for Oil Gas, Pulp and Paper, Food and wine industries.

We pride ourselves on the delivery of quality workmanship every time.

Dalkar Engineering is a well-established company which has built up a first-class reputation in the pipework industry by successfully delivering high-quality projects.

We're proud to say that we've maintained a strong belief in good workmanship and a job well done. Whatever the size of the undertaking, our whole team are aware of the responsibility they have for excellence, safety and respect for the environment.

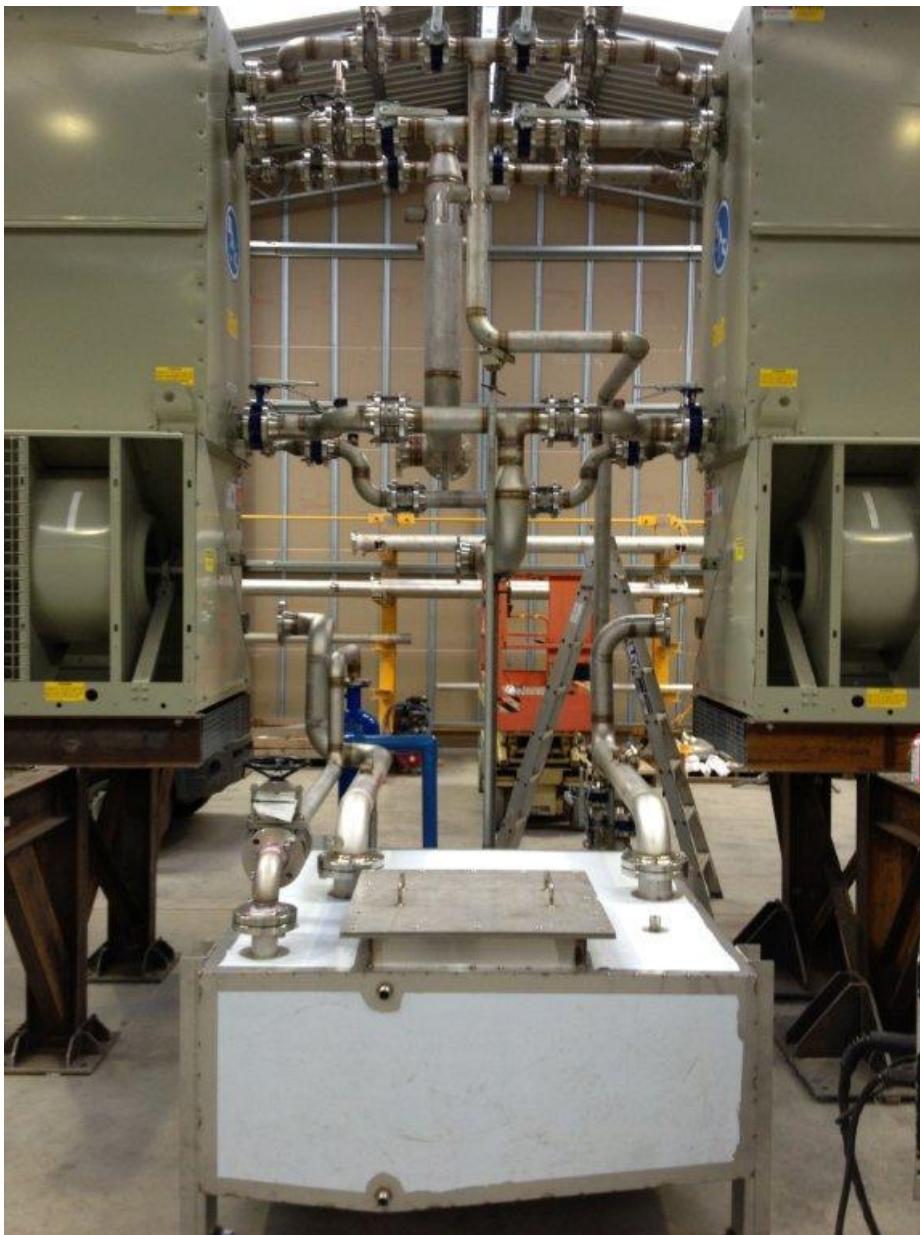

Dalkar Engineering believes that people are our main asset, and we're always trying to create the best possible working environment and foster continuous training and development with a strong emphasis on health and safety.

What We Do

Dalkar Engineering specialises in the manufacture and installation of carbon and stainless steel piping and products, whether its food grade milk lines or large bore high pressure steam work you require, the team at Dalkar Engineering have the expertise and know how to complete your project on time and in budget.

With our in house In Service Pressure Vessel and welding inspector we can supply inspect and certify all your pressure equipment, ensuring compliance with the latest OH&S regulations

Our History:

Established in 1993, Dalkar Engineering is a locally owned and operated Australian company, which specializes in all facets of engineering from conception to manufacturing and installation.

The highly trained and versatile teams at Dalkar Engineering are able to provide quality service in any facet of engineering fabrication.

Carbon and Stainless Steel pipework, aluminum, structural steelwork, tanks and routine maintenance all fall into the daily duties at Dalkar Engineering.

With its fully equipped workshop facilities and fleet of service vehicles Dalkar is committed to providing the best level of service and value for money to its clients in the South East and throughout Australia.

Key Personnel

C.E.O / Operations Manager:

Dale Tiller,

dale@dalkar.com.au

As Co-Founder of Dalkar Engineering Dale has an extensive background in piping both Stainless and Carbon steels. A multi ticketed pressure welder together with welding inspection and In Service Pressure Vessel inspector qualifications, Dale has worked in Oil and Gas, Mining and paper pulp and food prep industries and brings a wealth of knowledge to his role of CEO in this dynamic company.

Business Development / Estimator

Brett Tiller,

brett@dalkar.com.au

Brett brings to the table an extensive skills and knowledge base from many years dealing with the Oil and Gas sector (on and offshore) as a multi ticketed pressure welder and dealings with one of Australia's largest aluminium smelting operations. This has given Brett fantastically broad skills set from which he can draw enabling him to develop competitive tenders that suit client's requirements and budgets.

"Brett knows the little things that make a huge difference"

Workshop Manager

Brad Dunn,

brad@dalkar.com.au

"A product of the system" Brad has been with Dalkar since he was taken on as a 1st Year apprentice. A multi skilled multi ticketed pressure welder / boilermaker. Brad has the skills and experience to ensure things happen "Right". With an emphasis on safety Brad will ensure your project gets done the way you want it.

Company Overview

Our Value Proposition

- The provision of quality product to our clients in a manner that is efficient and effective
- Foster a culture of delivering a quality product on time every time
- Continuously develop our team through training.

Competitive advantage

- The ability to organise all aspects of any given project with our experienced team.
- Constant investment in State of the art technology with the aim of guaranteeing quality every time.
- Mount Gambier is a transport hub with several large carriers utilizing it as its base. Transport to any destination is achievable and highly cost efficient.
- Manufacturing costs have remained very competitive compared to other areas in Australia, a distinct advantage in keeping costs down to the client's whilst not sacrificing quality.

CAPABILITIES AND CAPACITIES

Services Provided

- In Service Inspection of Pressure Equipment
- Project Management
- Coded Welders to Australian Standards
- Welding inspector
- CAD drafting services
- Stainless Steel Fabrication
- Aluminium Fabrication
- Food Grade Quality Welding
